Indiana University School of Medicine Department of Medicine
– Division of Nephrology

“Recent Renal Grand Rounds Topics”

1. Hepatorenal Syndrome
2. The Role of Statin Therapy in CKD
3. Arginine Vasopressin Receptor Antagonists
4. Use of Ultrafiltration in Heart Failure
5. Thrombotic Microangiopathies
6. Molecular Pathophysiology of Renal Tubular Acidosis
7. Renal Artery Stenosis
8. Integrated Understanding of CVD and CKD: What We Know and Do Not Know
9. Podocyte Biology and Pathology in Proteinuric States
10. Cardiac Troponins in Chronic Kidney Disease
11. Urine Concentration Mechanisms
12. Adiponectin in Human SLE Nephritis: A Series of Unexpected Findings
13. Abdominal Compartment Syndrome
14. Renal Fibrosis: Role of BMP 7
15. CRRT and non-heparin anticoagulation
16. Nephrogenic Systemic Fibrosis
17. HIV Nephropathy
18. Prevention of Contrast Nephropathy
19. Lupus Nephropathy Therapies
20. Blood-stream infections in HD patients
21. Hepatorenal syndrome I
22. HRS II
23. Phosphatonin and Phosphorus Homeostatis
24. Vascular calcification and CKD
25. Calciphylaxis
